# SMITH'S TONIC SYRUP.

FOR THE CURE OF

FEVER and AGUE or CHILLS and PEVER

claims for it a superiority over all remedies ever offered to the public, for the SAFE, CERTAIN, SPEEDY, and PERMANENT cure of Agne and Fever, or Chille and Fever, whether of short or long standing. He refers to the entire Western and Southern country to bear him toatiniony to the truth of the assertion that in no case whatever will it fall to cure if the directions are strictly wed and carried out. In a great many cases, a single has been sufficient for a cure, and whole families have been cured by a single bottle, with a perfect reste ration to general health. It is, however, prudent and in every case more certain to cure, if its use is continued in naller doses for a week or two after the disease has en checked, more especially in difficult and long stand-g cases. Usually this medicine will not require any aid to keep the bowels in good order. Should the patient, however, require a cathartic medicine, a single dose of BULL'S VEGETABLE FAMILY PILLS will be suffi-

The couning SMITH'S TONIC SYRUP must have DR. JOHN BTLL'S private stamp on each bottle. DR JOHN BULL only has the right to manufacture and sell the original JOHN J. SMITH'S TONIC SYEUP, of Louisprivate stamp is not on each bottle, do not purchase, or

stead the following extract of a letter from Mrs. Rivers and popular Ministers of the Most learned, slopwest and popular Ministers of the Mchadist Episcopal Church, and who, at the time of writing, was stationed at Broadway Church, Louisville, Ky.

and who, at the tene of sering, was stationed at Broadway Church, Louisville, Ky.

Louisville, Ky.

Louisville, Ky.

Louisville, Ky.

Doctor John Bull—Dear Sir:—Many thanks to you for the medicine you have so kindly given me. I have been a great sufferer for years, and had the advice of various physicians. Some pronounced my spine, some my lungs, and some my heart to be the seat of my disease. I have been burnt, bistered, and cupped, till I had become disheantened. Several very eminent physicians who examined my spine informed me that I was threatened with paralysis or appoplexy any day, and that nothing but a seton would relieve me. I had a perfect borror of that, and was hesitating about having one inserted, when you kindly seat me your Sarsaparilla, which I immediately begun to take three times a day. I suffered terribly with a most scute pain in the right side of my head, especially when I would read or write for any length of time, and on rising to my feet. I would be perfectly blind for several minutes, and would have to hold to something to prevent falling. prevent falling.

I am most happy to inform you that the pain in my head
is entirely relieved; I suffer but seldon with my spine,
as d'indeed.

and then not so acutely. My appetite is good in and then not so acutely. My appetite is good in for the first time in my life, I enjoy my dinner more than any meal during the day.

You kindly sent me four bottles again last night, and I began again this morning, and I hope to be entirely relieved. Please accept my heartfelt thanks and best wishes. Very truly your most grateful friend.

M. B. C. Rivens.

My Journal abounds with similar letters, all of which I guarantee to be genuine and written by the persons Do not suffer yourself to be imposed on. Don't be drawn away after new and doubtful experiments. Don't risk your health by letting novices experiment upon you

My Sarsaparilla has stood the test of trenty-five years; it is still the Sarsaparilla of the day, and of the age, tow-ering over all others in popularity, and in its curative

Avoid all those who are trying to palm off on you other extracts of Sarsaparilla, so called. Remember, it is Dr. John Bull's Sarsaparilla, of Louisville, Ky., that is the old and reliable remedy for impurities of the blood, and

### ANOTHER TESTIMONY.

BENTON BARRACKS, Mcf., April 30, 1966, other John Bull—Deer Sir;— Knowing the efficacy of Sarsaparilla, and the healing and beneficial quality possesses, I send you the following statement of

In y case:

I was wounded about two years ago, was taken prisoner, and confined for sixteen months. Being moved so offen, my wounds have not healed yet. I have not ast up a moment since I was wounded. I am abot through the hips. My general health is impaired, and I need something to assist nature. I have more faith in your Karsupardilla than anything class. I wish that which is genuiss. Please express me half a dosen bottles, and oblige.

CAPT. C.P. JORNSON, St. Louis, Mo.

P. S.—The following was written April 20, 1886, by Mrs. Johnson, mother of Capt. Johnson:

Dr. John Bull—Dear Sir:—My husband was a shillful surgeon and physician in Central New York, where he died, ieaving the above C. P. Johnson to my care. At thirteen years of age, he had a chronic diarrhes and screfuls, for which I gave him your Sarsaparilla. It cured him. I have for ten years recommended it to many in New York, Ohio, and loves, for acrofuls, fever-sers, and general debility. Perfect success has attended it. The cures effected, in some cases of servights and force recommended mismulesse I am very antious for my son to again have recommend mismulesse I am very antious for my son to again have recommend to your Sarsaparilla. He is fearful of getting a spurious stricke, hence his writing to you for it. His wounds were terrible, but I believe he will recover.

#### BULL'S WORM DESTROYER.

FXTRACT OF A LETTER FROM GRORGIA.

Dester John Bull—Deer Str:—I have recently given your Worm Destroys everal trink, and fast it wonderfully effections. It has not failed, in a single instance, to have the wished for effect. I am doing a pretty large country practice, and have daily use for some article of the kind.

I am, sir, respectfully,

JULIUS P. CLEMENT, M. D.

in favor of my Worm Destroyer, that ne propager space is entirely too small to tell its merits.

It is an infallible remedy for Worms. Try it, and be convinced. See my Journal for a more full description.

SMITH'S TONIC SYRUP, BULL'S SARSAPARILLA.

BULL'S WORM DESTROYER.

C. B. BICKFORD & CO., TROY, KANSAS.

for the farmer.

WORK FOR THE MONTH OF JULY.

LATE HAYING.—The failure to gather the hay while it is at its best, is a test frequent and invenable neglect at this season. If farmers sould be convinced of how much of the feeting rains of hay is lost by leaving the grass to become ripe, hard, and woody, it would no longer a permitted.

How To CURRIPE HAY.—Hay that has been cut late may be improved by curing in the co.k instead of drying in the sans. Being comparatively dry when cut, it is very soon cured; and if put up in cocks as soon as it is thoroughly wilted, it will heat and steam and become much softened, and will remain greener than if suddried in the swath.

dried in the swath.

Cutting Wheat and Rye.—If there was any doubt about the best time for cutting grain, the general experience last year went far toward settling the queetion. All over the country a hot spell came on just as the cutting became be general, and the grain shrank badly. Had the harvest been a few days earlier, the total gain would have been enormous. In the writer's field, stopping the cutting for the 4th of July holiday last areaon, caused a loss of \$100 in the quality of the grain and in the shrinkage of the weight and bulk. As soon as the grain is solid, but will still crush dry between the finger nails, it may be cut, and hot weather will not injure it in the shock as it will when standing. Dead ripe grain is not only less valuable, but the straw is worth less than if cut three or four days earlier.

HAY CAPS—will serve a good purpose upon grain shocks, and are much more secure than cap sheaves.

RARE THE FIELDS after the grain bas Conx should not be neglected in the hurry of harvest. Frequent cultivation hastens growth and the mainring of the crop. To see the difference, leave a row or two uncultivated. Mach hand work later in the season may be avoided by a little work with the cultivator, and by keeping the week down. kerping the weeds down.

keeping the weeds down.

FODDER CORN may yet be sown. A rye of wheat stubble may be plowed and planted in drills with three bushels of corn per aers. The large Western or Sonthern corn, or Evergreen Sweet Corn, may be read. Some extra good ammoniated superphosphate, with porash added, or special corn-fodder fertilizer, should be sown broadcast and barrowed in before planting Dropping the firtilizer in the drill does not answer well for com when other manner is not used broadcast.

Roots Sow Rata barray early this month.

BOOTS.—Sow Rata bagas early this menth, and White Tarnips later. Superphosphate of lime or fine bone dust is specially adapted for these crops. A stubble may be prepared for them by giving one good plowing and harrowing; a cross barrowing a week later will kill many small weeds. One of the hand garden drills will sow these small seeds. The ridger or marker will be found very useful in preparing the ground for these crops.

will be found very useful in preparing the ground for these crops.

CABBAGES.—In planting late cabbages on potato ground there is no need to plow the whole area before planting. Plow open furrows, three foot from centre to centre, said mark out by cross furrows two feet apart. Drop a forkful of manure at each crossing, close the furrows over the manure, and set the plants in the lines of the cross furrows. After the planting is finished the ground may be worked out with a light plow or caltivator.

FODDER CROPS.—Hungarian Grass, common Millet or the Golden Millet may be sown this mouth for green fodder or hay. A bushel of seed per acre may be sown; though rather thick seeding, the fodder will be all the finer and better for it. Millet that was sown in May should be cut before the seed is ripe or the fodder gets hard, unless the seed is wanted. Millet seed makes an excellent addition to ground feed when mixed with corn and rye.

BECTYMENT WAS A SEED OF THE SEED OF

BUCKWHEAT may be made profitable upon a piece of rough or newly cleared ground. No other crop is so effective in mellowing rough cloddy land. The seed in northern localities should be sown before July 12th; otherwise early fall frosts may catch the crop. Grass and clover may sometimes be sown successfully with backwheat this mouth.

PRUNING can be done in this mouth. Look to in open head to the tree, that the sun and air may reach the interior.

may reach the interior.

Pigs.—Young pigs may be made ready for the market in 100 days if desired, by good feeding. The sow should be well fed with rich slop, to force a good flow of milk, and a feeding place for the pigs should be provided, in which they can get spare milk with a little fine ground barley meal or wheat middlings.

THE UTMOST CLEANLINESS should be preserved about the premises in hot weather. All wastes and garbage should be disposed of on a compost heap; and a load of good soil and soils from fence rows will be useful as the basis for it. Weeds should be gathered and added to the heap. Liberal additions of plaster will prevent disagreeable adors.

BLACKBERRIES AND RASPBERRIES.-Trent all plants that come up, and are not wanted for next year's fruiting, as weeds. Those to grow should be stopped by pinching at six feet for blackberries and four feet for raspberries. When the fruit is off of either, cut out the old caues that have born e it.

CURRANTS.—The long weak shoots that push from the interior are to be broken out, and also all others not needed. Pick the fruit early, as soon as well colored, for jelly, but for tab let it be thoroughly ripened. FLOWER GARDEN AND LAWN.-Everything

FLOWER GARDEN AND LAWN.—Everything should be kept in good order. Mow the lawn when it needs it. Remove large weeds that may start up. If the weather is dry, water ahould be used freely. The edgings to beds and walks should be kept neatly cut. Bedding plants need much care now, as they grow rapidly and will often need the kuife. Cut away flower clusters of plants enlitivated for their foliage, and trim and shape to sait the design. Tall flower plants, like dablias, gladioluses, lilles, &c., will require stakes. Do not use unrightly devices for holding up plants; straight stems of shrubs are better than painted sticks. Climbers should not be allowed to fail away from their supports. Keep the ground clean around per ennials, and save seed of all plants as they ripen.—Abridged from American Agriculturist.

Kitchen and Market Garden. Have no waste ground where weeds may grow. When the early crops are off, clear and plant

ASPARAGUS .- Pull such weeds as appear, and if the asparagus beetle is discovered, ent away the branches on which their eggs are placed. BEANS.—Plant for late; the Refugee is best for salting and pickling. Pinch the Limas when they have reached the top of the pole.

BEETS.—Sow for succession of young roots and to supply beet greens. Sow only early sorts

CABBAGES.—Set out for late crop. They need rich soil, and must be kept clean and watched for worms. Catch the white butterflies early in the morning, when they are slow in moving CELERY.—Set in rows three feet spart and six inches in the row on the level, in well manured soil. The trench system has nearly gone out of practice.

CARROTS.-Thin; bee until the tops prevent further work among them. CORN.—Plant early sorts for late use and dry-ing. Save seed from best specimens of the early crop.

CUCUMBERS.-Dust with ashes or lime to keep Egg plants can be forced by the use of liquid manure. Keep the fruit off the ground by plac-ing straw under it. If potato bugs abound, it is difficult to save the egg plants without daily vig-ilance.

MELONS.—Remove late sets that would not ripen. Save only pure seed. Turn to secure wen ripening.

Onjons.-Harvest as soon as the tops die down ore in a cool airy place. SWEET POTATOES.—Do not let the vines root. Move them when hoeing by lifting with the boo

SQUASHES.—Keep clear of bugs by hand pick-ing. Let the vines strike root at the joints. TOMATOES.—Keep from the ground by frames or trellises. Brush or hay is better, than noth-ing.—Agriculturist.

CARBOLIC ACID AND WEEDS.—As a weed destroyer carbolic acid seems likely to prove a boon to gardeners. Such weeds as dandelious are killed by one application, the mode of applying it to destroy single plants being to make a bole in the crown with an irou point, and then to pour in little of the liquid from a bottle. For paved yards and also for garden paths the carbolic acid is mixed with from ten to fifty times its quantity of water in a bucket, according to its original strength, and applied with a brush or broom, or from a rose watering can; a sunny day being the best.—Floriet and Pamelegist.

NEVER break up your soil to start blue grass low it on the surface, and put on your cattle. MAKE honey while the clover shines.

The True Way to Sell Goods! HIGHEST HONORS

UNITED STATES World's Exhibition, 1876.

Mason & Hamlin CABINET ORGANS Unanimously assigned the "FIRST RANK

SEVERAL REQUISITES"

Of such Instruments! The MASON & HAMLIN ORGAN CO. have the honor to amounce that the organs of their manufacture have been unanimously assigned "the FIRST RANK in the SEVERAL REQUISITES of instruments of the class" by the Judges at the CENTENNIAL EXHIBITION at Philadelphia, 1876, and are the ONLY INSTRUMENTS OF THIS GENERAL CLASS AWARDED THIS RANK. This is after the severest competition by the best makers, before one of the most competent juries ever assembled. They have also received the MEDAL, but, as is well known, medals of equal merit have been awarded all articles deemed worthy of recognition; so that it will be easy for makers to advertise that they have received "first makers."

sy for makers to advertise that they have received "first medals."
The differences in competing articles, and their comparative excellence, are recognized in the Reports of the Judges, from which the following is an extract:

"THE MASON & HANGLIN ORGAN CO."S exhibit of Reed Organs and Harmonium shows instruments of the FIRST RANK IN THE REVERAL REQUISITES OF INSTRUMENTS OF THE GLASS, viz. Smoothness and equal distribution of tone, scope of expression, resonance and singing quality, freedom and quickness in action of keys and bellows, with thoroughness of everkmanship, combined with simplicity of netion." (Signed by all the Judges.) The Mason & Hamlin Organs are this declared to rank first, not in one or two respects only, but in the SEVERAL EEQUINITES of such instruments, and they are the ONLY ones assigned this rank. This triumph was not unexpected for the Mason & Hamlin Cabinet Organs have uniformly been awarded the highest honors in competitions in America, there having been scarcely six exceptions in hundreds of competitions. They were awarded highest honors and
